 PREPARED: September 2021

CENSUS DEFINITION:

The U.S. Census Bureau defines a **vacant housing unit** as a housing unit with no one living in it at the time of the interview, unless its occupants are only temporarily absent. In addition, a vacant unit may be one which is entirely occupied by persons who have a usual residence elsewhere, e.g. cottage rental. New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place.
